**STALLION:** \_\_\_\_\_

**CONTRACT FOR DELIVERY OF STALLION SEMEN**

I hereby confirm my reservation for the stallion \_\_\_\_\_ for the breeding season of 2010 for the mare \_\_\_\_\_, Reg. No. \_\_\_\_\_, AHHA No. \_\_\_\_\_. I have enclosed the booking fee in the amount of \$600.00 and I understand that this booking fee is not refundable and is applicable to the breeding fee. The breeding season runs from April 1 through July 31 of each year. The stallion is standing at Rancho Corazon LLC and is fully approved and licensed for breeding by the AHHA.

I understand that the total Breeding Fee of \$1500.00 and a refundable deposit of \$350.00 applicable to the cost of shipping semen are due prior to semen delivery. The shipping deposit is refundable and will be refunded to the mare owner in the proper amount due at the end of the current breeding season.

Rancho Corazon LLC assumes responsibility only to deliver live semen from the stallion in viable condition at the time of delivery to the mare owner. The semen must be handled and administered by a licensed veterinarian, who is experienced in the art of artificial insemination, on the day of delivery to the mare herein described.

If Rancho Corazon LLC fails to ship semen on the correct dates or if a licensed veterinarian determines after examining the semen, using proper procedure, that the semen is not viable for breeding, the mare owner will be entitled to a free replacement of the shipment of semen.

The mare must be examined by a licensed veterinarian between 40 and 45 days after the last day inseminated. The stallion agent must be notified at this time as to the pregnancy status. Another such examination of the mare must be made 55 to 60 days after the last insemination and the stallion agent must again be advised of the mare's pregnancy status.

Should this mare be found by a veterinarian to be barren at any time after insemination, the mare may receive more shipments of semen as requested until the end of the current breeding season.

The mare owner may substitute another mare at any time during the breeding season if it is determined by a licensed veterinarian that the original mare is unable to conceive.

If after the full breeding season of 2010 neither the first (original) nor the second (substitute) mare has produced a foal which can stand up alone and nurse, the mare owner is entitled to receive shipments of semen to the mare named in this contract during the following breeding season only, paying only the shipments costs, not an additional breeding fee. The breeding fee is not refundable.

The mare owner understands that the AHHA MARE BREEDING PASSPORT and the DELIVERY CERTIFICATE FOR TRANSPORTED SEMEN must be signed and returned to Rancho Corazon LLC as per instruction in order for this contract to be guaranteed.

As the owner of the mare I fully understand and accept the risks of loss of or damage to the mare whether by death, disease, injury, or infection resulting from insemination by transported semen. Because I am aware of these risks I agree to hold Rancho Corazon LLC, it's owners, managers, and employees, and the stallion owner agent harmless in case of death, disease, injury or infection resulting from this insemination.

This contract cannot be assigned or transferred by the mare owner. Should this stallion or mare be sold no refund shall be due from Rancho Corazon LLC under any circumstances.
